

Information on 3rd Party Electric Suppliers for the State of Delaware

Who are the 3rd Party Suppliers who can serve customers of Delaware?

The list of 3rd Party Suppliers, their service territory, and customer class can be found here:

<http://dep.sc.delaware.gov/electric/elecsupplierinfo.pdf>

What 3rd Party Suppliers have paid ACP over the past two years?

The PSC does keep track of 3rd Party Suppliers who have paid ACP and can provide the number of suppliers who have paid, but the names are confidential.

ACP payments are paid company by company and are tracked by the PSC by company. Once a company pays ACP, the next time the company pays ACP their payments will be increased into the next ACP payment bracket.

Since the PSC can provide the number of 3rd party suppliers who have paid ACP, can the aggregate dollar amount spent on ACP be reported?

Information will be provided during the PSC presentation to the Taskforce.

Are there other enforcement mechanisms to ensure that 3rd Party Suppliers achieve the RPS targets? Or is the only mechanism through ACP payments?

To date, the PSC has never had a supplier fail to comply with the RPS. If, in the future, there was a circumstance where a supplier was not meeting the RPS requirements (either through ACPs or supplying RECs & SRECs) the Commission would have the authority to suspend or revoke the supplier's certification. See the info below:

FYI — 26 Del. Admin. C. § 3001 - 10.2

<http://regulations.delaware.gov/AdminCode/title26/3000/3001.shtml#TopOfPage>

10.2 Failure to Comply with these Rules. The failure by any Electric Supplier to comply with these requirements and the requirements in other Sections of these Rules may result in penalties, including monetary assessments, suspension or revocation of the Electric Supplier's ESC, or other sanction as determined by the Commission.

How much electricity do the 3rd Party Suppliers supply to the market?

This is based on their total, actual retail sales numbers, and varies by year. Below, you will see the info from 2008.

Megawatt-hours Info for Compliance Year 2008

<u>TPS Totals</u>	3,381,543
Delmarva Total	4,801,523
Total	8,183,066

In order to obtain the 3rd Party Supplier's current and future load forecasts, interested parties would need to obtain that information from the suppliers directly or does the PSC have that information available?

The PSC does not regulate the 3rd Party Suppliers therefore they do not have load information. In addition, 3rd Party supplier loads would more likely reflect their business growth model than a routine growth rate.
